

# BUSINESS INCUBATOR

Department of the A.V.R.U.L. (Limousin office for university knowledge transfer)

IN VIVOLIM  
biotechnology project in Limousin

## Fields of Expertise

Support and assistance to innovative company creation project bearers.

## Identity

The Department of AVRUL Incubator, public incubator created in 2000 as part of the law on innovation, is located in Limoges Ester Technopole.

## Activities and products

### The incubator's missions are as follows:

- Sensitization, detection and assessment of company creation projects within academic teaching establishments or research bodies,
- Hosting and logistics support for company project bearers,
- Support for creators during the creation of their company projects,
- Information and introduction to industrial partners, financial or scientific managers,
- Creator training.

### The incubator provides assistance:

- By providing the minimum necessary infrastructure to each project bearer,
- By granting incubation grants,
- In preparing for Ministry competitions,
- In defining Business plans,
- In the search for funding,
- In contacts with the University or Engineering schools,
- In the search for bearers and/or co-bearers...

The incubator currently supports 15 projects in the biotechnology, materials, electronics, mechanics engineering and humanities fields.

**Companies created in biotechnology:** Melipharm; B Cell Design; Khloris; Oncomedics; Covertis; Biocompack.
